PERGAMON PRESS LTD · LONDON

Geochim. et Cosmochim. Acta

EDITORS

PROF. C. W. CORRENS, *Sedimentpetrographisches Institut der Universität, Lotzestr. 13, Göttingen, British Zone, Germany.*

DR. E. INGERSON, *United States Department of the Interior, U.S. Geological Survey, Washington 25, D.C., U.S.A.*

DR. S. R. NOCKOLDS, *Department of Mineralogy and Petrology, The University, Cambridge, England.*

PROF. F. A. PANETH, F.R.S., *Max-Planck-Institut für Chemie, Mainz, Saarstrasse 23, Germany.*

PROF. L. R. WAGER, F.R.S., *Department of Geology and Mineralogy, The University, Oxford, England.*

PROF. F. E. WICKMAN, *Naturhistoriska Riksmuseets, Mineralogiska Avdelning, Stockholm 50, Sweden.*

I. GENERAL

1. Papers on Geochemistry should be submitted to the editors for the appropriate country or language (*Papers on Cosmochemistry should be sent to Prof. F. A. Paneth, F.R.S.*). Papers submitted for publication will naturally be judged from the standpoint of scientific originality and novelty. Technical details of apparatus used in scientific investigation can, however, be presented in brief notes. The preparation of progress reports and review articles will be invited by the Editors from time to time. The Journal will appear as independent and complete numbers, which will be sold separately and combined into volumes of about 300 pages.

2. Only papers which have not been previously published will be accepted. The publishers retain exclusive publication rights for all papers in all languages and countries, on acceptance and until the 31st December of the year following the year when the printed paper appears. Authors must agree not to publish elsewhere a paper submitted to and accepted by *Geochimica et Cosmochimica Acta*.

3. Authors will receive 75 free reprints of their papers. Additional copies can be purchased if ordered at the time the first proofs are returned.

II. MANUSCRIPT REQUIREMENTS

1. The manuscript must be written in one of the three official languages, English, French, or German.

2. The manuscript should be an original typewritten copy (not a carbon). The text must be ready for printing and should be carefully checked for errors. Authors will receive proofs for correction.

3. Half-tone illustrations should be restricted to the minimum necessary. They should accompany the manuscript mounted on separate sheets. Line drawings may be redrawn for the sake of uniformity and should therefore include all relevant details. Photographs should be enlarged sufficiently to permit their clear reproduction in half-tone. If words or numbers appear in photographs, two copies are requested, one clearly printed and the other without inscription. All illustrations should be provided with descriptive legends, which should accompany the manuscript on a separate sheet.

4. Only such references to literature should be given as are referred to in the text. Literature references are to be listed together at the end of the manuscript and not given as footnotes. All references should be listed alphabetically according to the Harvard system:

AHRENS, L. H. (1952) Geochim. et Cosmochim. Acta **2**, 168

and should include the standard abbreviated title of the journal, year, volume number and page number.

5. The text of articles submitted should be concise and in a readily understandable style. The technical description of the methods used should only be given in detail when such methods are new. The essential contents of each paper should be briefly recapitulated in an abstract in English. Such an abstract may, however, be submitted by the author in the language of the original typescript for translation into English by the editorial staff.

6. To conserve space authors are requested to mark less important portions of the paper (such as description of methods, record of experimental results, etc.) for printing in smaller type.

CONTENTS

No. 1

Page

JULIAN R. GOLDSMITH and F. LAVES: The microcline-sanidine stability relations . 1

EARL INGERSON: Geochemical work of the geochemistry and petrology branch U.S. Geological survey 20

R. J. ALLENBY: Determination of the isotopic ratios of silicon in rocks . . 40

No. 2

L. H. AHRENS: The lognormal distribution of the elements 49

J. C. DALTON and S. J. THOMSON: Recent studies on iron meteorites. V. Improved methods for the isolation of uranium and thorium from meteorites . . . 74

KALERVO RANKAMA: A calculation of the amount of weathered igneous rock . 81

R. W. MCLAUGHLIN: Iron and titanium oxides in soil clays and silts . . . 85

No. 3

FRANS E. WICKMAN: The "total" amount of sediments and the composition of the "average igneous rock" 97

D. M. SHAW and J. D. BANKIER: Statistical methods applied to geochemistry . 111

W. GENTNER, K. GOEBEL und R. PRAG: Argonbestimmungen an Kalium-Mineralien. III. Vergleichende Messungen nach der Kalium-Argon- und Uran-Helium-Methode 124

D. F. C. MORRIS and F. M. BREWER: The occurrence of gallium in blende . . 134

KALERVO RANKAMA: The isotopic constitution of carbon in ancient rocks as an indicator of its biogenic or nonbiogenic origin 142

Announcements 152

No. 4

ROBERT M. GARRELS: Mineral species as functions of p_H and oxidation-reduction potentials, with special reference to the zone of oxidation and secondary enrichment of sulphide ore deposits 153

S. J. THOMSON and G. WARDLE: Coloured natural rocksalts: a study of their helium contents, colours and impurities 169

P. G. HARRIS: Distribution of germanium among coexisting phases of partly glassy rocks 185

Book reviews:

"Gmelins Handbuch der anorganischenchemie" (Reviewer: C. W. CORRENS) . . . 196

No. 5

HEINRICH D. HOLLAND and J. LAURENCE KULP: The transport and deposition of uranium, ionium and radium in rivers, oceans and ocean sediments . . . 197

HEINRICH D. HOLLAND and J. LAURENCE KULP: The mechanism of removal of ionium and radium from the oceans 214

F. S. GRANT: The geological significance of variations in the abundances of the isotopes of silicon in rocks 225

Book reviews:

"The Comets and their Origin" by R. A. LYTTLETON (Reviewer: F. A. PANETH) . . 243

"Gesteine und Minerallagerstätten," Band II, by PAUL NIGGLI in collaboration with ERNST NIGGLI (Reviewer: GEORGE T. FAUST) 243

No. 6

S. R. NOCKOLDS and R. ALLEN: The geochemistry of some igneous rock series: Pt. II 245

H. G. THODE, R. K. WANLESS and R. WALLOUCH: The origin of native sulphur deposits from isotope fractionation studies 286

KURT SERVOS: Meteorites in the Carl Bosch Collection of Minerals . . . 299
